

The intelligent home for all your insurance.

mypoli.ai

Investor Presentation · 2026

People are flying blind on their insurance.

"I tried to claim on a broken window in my rental property. I had no idea what was covered. I spent hours trying to get someone on the phone just to get a straight answer."

— Shane Duffy, Founder

73%

of policyholders
never read their
policy

68%

don't know what
they're NOT covered
for

€2.1B

lost to unclaimed
valid policies
annually

Three burning problems:

- Rejected claims — exposed at the worst moment
- Overpaying — overlapping cover, wasted money
- Inertia — too confused to compare or switch

Built in four layers.

AI is the engine. Clarity is the product.

Everything in one place.

Most people have 4–6 policies across different insurers, different renewal dates, and documents buried in email folders or kitchen drawers.

MyPoli.ai is the single place where all of it lives.

One renewal dashboard.

One coverage view.

One place your family can find everything.

Replace with screenshot

Know what you're actually covered for.

Plain English analysis

Every exclusion, limit and condition explained simply

Coverage Score 0–100

Across Life, Health, Property, Cyber, Liability, Income

Gap identification

Specific to your property, location and family profile

Underinsurance calculator

Are you covered for what your assets are actually worth?

Market benchmarking

Are you overpaying vs comparable policies right now?

This is not a chatbot.

*This is a persistent intelligence layer
built on your actual policies.*

Replace with screenshot

Information without action is just noise.

Switch to better cover

Live market comparison → one-click switching

Renewal management

Alerts before renewal · pre-filled forms · negotiation tips

Claims guidance

Step-by-step support when you actually need to claim

Next of Kin vault

Family access in an emergency — without needing to call anyone

Proactive recommendations

Flagged when your life changes: new property, new child, new job

Replace with screenshot

The B2B layer that makes this fundable.

White-Label Broker Portal

Fully branded platform per broker · custom domain · admin panel

Marketplace Engine

Coverage gap → product recommendation → quote in one flow

Enterprise API

€500/mo · carriers and aggregators embed MyPoli intelligence

Broker Analytics

Client coverage scores · gap trends · renewal pipeline visibility

*Investors prefer B2B. This is the B2B layer.
Consumer growth funds the ecosystem. The ecosystem funds the raise.*

"Why not just paste your policy into ChatGPT?"

The question every investor will ask. Here's the answer.

Generic AI (ChatGPT / Claude)

- ✗ Reads one document at a time
- ✗ No memory between sessions (Free Version)
- ✗ No market price comparison
- ✗ No life profile or gap analysis
- ✗ No switching or claims action
- ✗ No family / next of kin access
- ✗ No broker or insurer integration

MyPoli.ai

- ✓ Holds your entire insurance profile
- ✓ Persistent — builds over time
- ✓ Live market benchmarking and pricing
- ✓ Personalised to your property and family
- ✓ One-click switching and claims guidance
- ✓ Next of kin vault with emergency access
- ✓ White-label API for brokers and carriers

A massive market with a clarity gap.

TAM · SAM · SOM

TAM €1.4T — Global insurance brokerage market

SAM €42B — Europe — AI-addressable broker + consumer segment

SOM €850M — UK & Ireland 5-year addressable market

Three people who need this today.

Sarah, 38

Homeowner & parent

Has home, life, car and health insurance — never read any of them. After a flood scare she doesn't know if she's covered. Uploads all four policies. Within 60 seconds her coverage score is 62 — Flood is red.

→ Adds flood cover. Sets up next of kin access for her husband.

James, 52

Independent broker

Manages 400 clients. Renewal season is brutal — no visibility into who has dangerous gaps until they call with a claim. White-labels MyPoli.ai. Now sees every gap across his entire book from one admin dashboard.

→ Identifies 68 clients with cyber gaps. Sends a targeted offer in one click.

Maria, 71

Retired, lives alone

Has several policies her late husband set up. No idea what they cover. Her daughter is abroad. Daughter logs in via next of kin access — sees all policies, scores and key contacts without calling anyone.

→ Finds an unclaimed life policy worth €45,000.

Two streams. One platform. Built to scale.

Consumer — Freemium

- **Free**
3 AI analyses, 5-page upload limit
- **€9.99/month**
